

# THE SLURRYPRO<sup>®</sup> DRAIN PLUG

## INCREASE YOUR HOURS OF PRODUCTION THIS WINTER

Do you have issues with losing time to frozen slurry pumps in the morning or draining them in the evening?

SLURRYPRO<sup>®</sup> - A BETTER SLURRY PUMP EXPERIENCE

**SlurryPro originated from a firm belief that your slurry pump experience could and should be better. With this in mind we are proud to present the SlurryPro Drain Plug.**

Built for the mining and quarrying industry, the SlurryPro Drain Plug is an innovative way to maintain your pumps performance during the cold winter months, increase your production hours and protect your pump against frost damage.

## How It Works

- An insert is bonded into a modified SlurryPro liner
- A rubber plug is put into the insert and bolted in
- Pumping performance and wear-life are unaffected
- Removing the plug drains the pump - it's that simple!

The SlurryPro Drain Plug can be supplied new or retro-fitted and is now available to order from Atlantic Pumps. For further details please call us on 0800 118 2500, email [info@atlanticpumps.co.uk](mailto:info@atlanticpumps.co.uk) or visit us online at [atlanticpumps.co.uk](http://atlanticpumps.co.uk).
