Repair and rubber relining of Linatex® pump and cyclone parts

Worn rubber parts don't always need replacing: we repair them, or reline them completely. Parts for Linatex® cyclones we supply new or repair.

01
Repair Linatex® pump parts
We add extra rubber where it has worn away, instead of buying new.

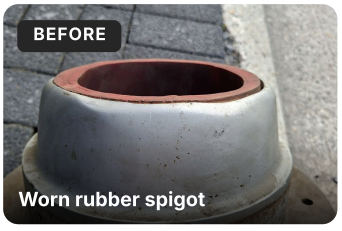

02
Supply all Linatex® cyclone parts
From inlet head to spigot and lipseal, for the complete SE series.

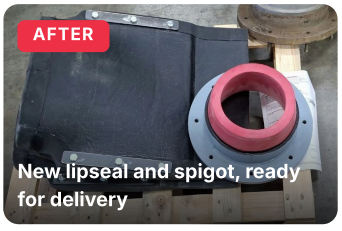

03
Repair Linatex® cyclone parts
Housings, cones, vortex finders and spigots back in top condition.

04
Full relining
Old rubber completely removed and a new rubber layer applied to cyclone and rubber-lined parts.

IN PRACTICE · BEFORE AND AFTER

RELINING OF PARTS

1. **You send us the part**
   We inspect the wear and send you a quotation: repair or replace.
2. **Rubber removal and sandblasting**
   The old rubber is removed completely and the metal is blasted.
3. **New rubber lining**
   Natural rubber 35 Shore A, in the thickness your application needs.
4. **Finishing and delivery**
   Outside in anti-corrosion paint. Lead time 3 to 4 weeks.

Linatex® pump parts
Here we don't remove all the rubber: we add extra rubber where it has worn away.

LINATEX® CYCLONES IN OUR RANGE

Type	Cone build-up	Parts
SE 1.5.06	1 cone	14
SE 2.09	1 cone	14
SE 2.12	1 cone	14
SE 3.15	lower and middle cone	15
SE 4.18	lower and middle cone	15
SE 5.24	lower, middle and upper cone	16
SE 6.30	lower, 2 middle and upper cone	17
SE 8.36	lower, middle and upper cone	16
SE 10.36	lower, middle and upper cone	16

Per cyclone: inlet and outlet head, vortex finder, cones, spigot, spigot lipseal, measuring flange, separating membrane and tube, pressure gauge, overflow pipe (pipe, T-piece, sleeve) and cylindrical connection. 137 parts in total for 9 types.

Worn part? Send it to us.

We assess it and tell you whether it can be repaired, and what it costs.
